## VOCABULARY

CONTEXT VOCABULARY		SUBJECT VOCABULARY	
WORD / PHRASE	MEANING	WORD/PHRASE	MEANING
Ocean	An ocean is a large area of salt water between continents. Oceans are very big and they join smaller seas together.	Artist	Someone who expresses themselves through painting, drawing, collage or sculpture.
Biodegradable	If a material is biodegradable, it means it will break down into natural materials over time. It is good for our environment .	Collage	To collage, is to create by sticking pieces of paper and fabric ('found objects') together on a surface to make a work of art.
Plastic	Plastic is a non-biodegradable material. It does not naturally break down and it is harmful to our environment.	Create	To form an idea from your imagination and share it with others.
Recycle	To recycle a material means to reuse it and make it into something new. It is not wasted.	Geographer	A geographer strives to understand the world and the things that are in it, how the world began and how things change over time.
Habitat	A place where plants and animals live.	Physical geography	Recognising natural features in the world such as mountains and rivers.
Coral Reef	A large underwater structure made of dead and living corals. They grow in warm tropical waters.	Human Geography	Recognising things in the world that have been put there by People such as cities, roads and bridges.
		Compare	Look at different examples and try to see what is the same about them but also what is different.

### FINGER TIP KNOWLEDGE
